CAREER OBJECTIVE

A spring software engineer with strong foundations in DevOps, cloud computing, and AI-based application development. Skilled in building end-to-end systems involving machine learning, backend APIs, and cloud deployment. Seeking opportunities to contribute to scalable and innovative solutions while continuously enhancing technical expertise.

SKILLS

- **Languages:** Python, Shell Scripting
- **AI/ML:** YOLO (Object Detection), Image Processing
- **Backend Development:** Flask APIs
- **Mobile Development:** Flutter
- **Containerization & Orchestration:** Docker and Kubernetes
- **Monitoring Tools:** Dynatrace, Prometheus and Graphana
- **Cloud Platform:** AWS (EC2, S3, VPC)
- **Devops Tools:** GIT and Jenkins
- **Database:** MySQL and Cloud SQL

PROJECTS & VIRTUAL EXPERIENCE

Rust Detection AI Mobile Application

YOLO, Flask, AWS EC2, Flutter | Mar 2026

- Built an end-to-end AI system for rust detection using YOLO
- Developed Flask API and deployed on AWS EC2
- Created Flutter mobile app with real-time detection
- Implemented severity classification (Mild, Moderate, Severe)
- Added history, sharing, and PDF report features
- Achieved ~85% accuracy with fast response time

CI/CD Three-Tier Application

Docker, Jenkins, AWS | Nov 2025

- Deployed containerized app using Docker Compose
- Implemented CI/CD pipeline using Jenkins
- Monitored system using Prometheus & Grafana

Flask Deployment Automation System

Python, Flask | Jan 2026

- Automated deployment of web apps from GitHub
- Built dashboard for monitoring and control

EDUCATION

BCA — CGPA: 9.1/10

St Joseph's College, Mysore (2023–2026)

Class XII — 87%

Class X — 85%

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Dynatrace Fundamentals
- Generative AI
